**Our association “From Oblivion to Memory” (FOM) is founded upon a shared commitment that brings together descendants, families, scholars, and dedicated allies in a collective effort of remembrance and preservation.**

**As an emerging institution devoted to safeguarding historical truth, upholding human dignity, and strengthening intergenerational memory, we work to ensure that this defining chapter of Ethiopian history, shaped by the Yekatit 12 massacres and the subsequent deportations and imprisonment carried out under Italian fascist rule, is rigorously documented, responsibly preserved, and faithfully transmitted to future generations.**

**Anchored in collective responsibility and guided by the highest ethical, archival, and academic standards, we are establishing an institution dedicated to four fundamental actions:**

</aside>

#### **● We preserve truth**

**We collect, verify, and safeguard historical records, testimonies, and archival materials to ensure an accurate and enduring account of the deportations and imprisonments that followed Yekatit 12.**

---

● **We restore dignity**

**We honor the names, identities, and lived experiences of those who were uprooted, ensuring that their stories are remembered with respect, visibility, and historical justice.**

---

● **We reconnect families**

**We support descendants in rediscovering lost ties, rebuilding fragmented lineages, and reclaiming a shared heritage that was dispersed across generations and continents.**

---

● **We build a legacy of remembrance**

**We develop long-term spaces : digital and, eventually, physical, where memory, research, education, and dialogue can flourish for future generations.**
